XCode, IntelliJ IDEA, GitHub, MySQL, DrRacket Wix, Webflow, Canva

Core Qualities: Team Player, Detail-Oriented, Problem Solver, Public Speaker, Punctual,

Strong-Communication

Languages: Bengali (Read and Write), Hindi, and Urdu

Relevant Coursework

Data Structure Introduction to (C/C++) Software Design Laboratory Website Design Operating Systems
Algorithms Python Software Engineering Computer Graphics DBMS

Academic Projects

- Used REACT to build an ecommerce website named "LASSO" (Fall 2022)
- Used JavaFx and OOP concepts to read a text file and create a pie chart to calculate the probabilities of the frequency of characters in a document (Summer 2022)
- Used MySQL to create a database for students which input student name or student ID and displayed their courses, current semester, instructor name and department (Summer 2022)
- Applied C and C++ languages to create a user login system. The system asked users to give a username and password which created a user account with the credentials. If the user did not exist, then it showed an invalid message (Fall 2021)
